

Data Source Report: Students Performance Dataset

1. Introduction

This report identifies and evaluates a dataset related to student academic performance. The dataset will be used for data cleaning, analysis, visualization, and predictive modeling.

2. Dataset Information

Dataset Name: Students Performance Dataset

Type: Secondary Data

Format: CSV

Number of Records: 1000 Students

Number of Features: 9 Columns

Attributes Included

1. Student_ID
 2. Gender
 3. Race/Ethnicity
 4. Parental Level of Education
 5. Lunch
 6. Test Preparation Course
 7. Math Score
 8. Reading Score
 9. Writing Score
-

3. Data Source Description

The dataset contains information about students' academic performance and factors affecting their examination scores.

The dataset includes:

- Student ID
- Gender
- Race/Ethnicity
- Parental Education
- Lunch Type

- Test Preparation Course
- Mathematics Score
- Reading Score
- Writing Score

4. Primary vs Secondary Data

Primary Data	Secondary Data
Collected directly by the researcher	Collected by another organization
Surveys, interviews, observations	Public datasets, reports, websites
More expensive	Less expensive
Time-consuming	Readily available

This project uses **Secondary Data** because the dataset was obtained from a public source.

5. Data Quality Assessment

Check	Result
Missing Values	0 Found
Duplicate Records	0 Found
Data Format Consistency	Verified
Student_ID Validation	Unique IDs Assigned

The dataset is clean and suitable for analysis.

6. Sample Raw Data

Student_ID	Gender	Math Score	Reading Score	Writing Score
STU0001	Female	72	72	74
STU0002	Female	69	90	88
STU0003	Female	90	95	93
STU0004	Male	47	57	44
STU0005	Male	76	78	75

7. Importance of the Dataset

- Helps analyze factors affecting student performance.
 - Useful for educational research.
 - Suitable for learning data analytics techniques.
 - Can be used for dashboard creation.
 - Supports machine learning and predictive analysis projects.
-

8. Conclusion

The Students Performance Dataset is a reliable secondary data source containing 1000 student records and 9 attributes, including a unique Student_ID column. The dataset contains no missing values and no duplicate records, making it suitable for data collection, cleaning, analysis, and visualization tasks in data analytics projects.

The dataset provides valuable insights into factors that influence student academic performance and can be effectively used for educational data analysis.
